Atmospire Tablet Kiosk Setup

A quick, one-time setup guide for installing Atmospire on a dedicated tablet display.

1. Install Fully Kiosk Browser

Download and install the **Fully Kiosk Browser** application from the Google Play Store or directly from the Fully Kiosk official website.

2. Configure Home URL

Open Fully Kiosk Browser settings and set the **Home URL** to:

https://atmospire.cam/paid

3. Follow On-Screen Instructions

Once the page loads, Atmospire will guide you through a simple, one-time setup process.

4. OpenWeatherMap API Key

You will be asked to provide an **OpenWeatherMap API key**. Create a free OpenWeatherMap account, generate an API key, and paste it into the setup screen.

Important: Newly created OpenWeatherMap API keys may take up to **one hour** to activate. If weather data does not appear immediately, please wait and refresh the page later.

5. Complete Payment

Complete the payment process as instructed. After successful payment, Atmospire will activate automatically on the tablet.

Setup Complete

Your tablet is now locked into kiosk mode and will continuously display Atmospire for end users.
